SM0101

**HIGH SEAM
FEEDER BREAKER
MATERIAL HANDLING**

EQUIPMENT

**ONE-STOP SOLUTION OF
MODULAR BREAKER SYSTEMS**

An integral part of your mining operation

The SM0101 High Seam Feeder-Breaker is engineered for a wide range of seam applications, delivering exceptional productivity and reliability even under the most demanding conditions.

Designed to seamlessly integrate into your mining operation, the SM0101 enhances the efficiency of your mining, haulage, and conveying systems, enabling peak operational performance and maximized production.

Robust Engineering and Design

Core Components:

Built on decades of engineering expertise and proven field performance, the SM0101 features a sturdy, all-welded frame, ensuring long-lasting durability.

Material Handling

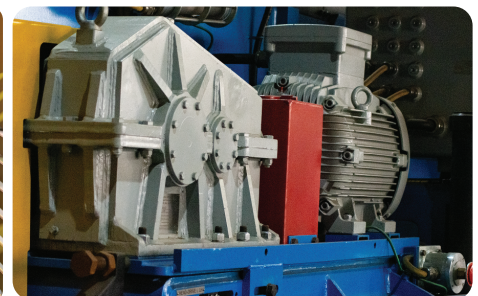

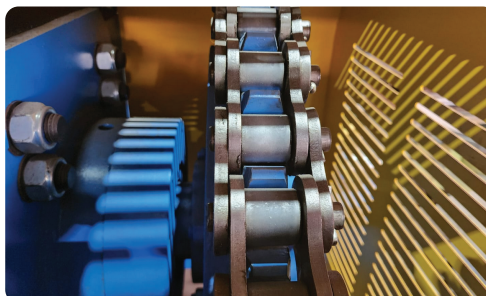

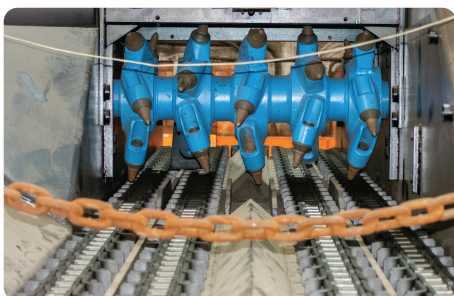

- Consistent Material Reduction: A powerful rotary pick breaker ensures consistent reduction of mined material to a manageable size, which is then discharged at a steady rate, minimizing spillage and reducing belt wear.

Strategic Component Placement:

Controls and components are strategically positioned for safety, ease of troubleshooting, and simplified maintenance, ensuring that the machine is user-friendly and efficient to operate.

Tailored Equipment Configuration

- The SM0101 High Seam Feeder-Breaker comes with a standard configuration consisting of a hopper, breaker, and conveyor.
- Intake ends are customized to match your preferred haulage methods, whether it's a ram car, swing gate, or three-way dump. These intake ends are compatible with specific haulage equipment like ram cars, scoops, shuttle cars, and battery-powered haulers.
- Staked or hinged sideboards are available in various heights, offering additional capacity customization.

CE AFRICA HIGH SEAM FEEDER BREAKER

GENERAL SPECIFICATIONS

MODEL NUMBER	SM0101
TOTAL WEIGHT	24400 kg
OPERATION LENGTH	10583 mm
OPERATION WIDTH	3130 mm
OPERATION HEIGHT	1994 mm
TRAMING HEIGHT	1950 mm
MAXIMUM CONVEYOR HEIGHT	1144 mm
CONVEYOR WIDTH	1210 mm
DISCHARGE RATE	1000 t/h
WEAR STRIP MATERIAL	HARDOX 400
OPERATIONAL VOLTAGE	1000 V
ANCHOR POINTS	7
